Ash Tree Project.

info@shropshirehardwoods.com

Remnants from the making of a chair may produce a stool.

Remnants from the stool may produce a jewellery box.

Remnants from the jewellery box may produce a door wedge.

The aim of this project is to use as much of a single ash tree as possible to produce as wide a variety of items as possible, with a view to displaying them all together at the Bishops Castle Michaelmas Fair, September 18/19 2010 including all remaining off cuts and waste.

An ash tree has been sourced on National Trust property overlooking Wenlock Edge. The felling of the tree is necessary to improve the quality of the remaining woodland, making the tree a by product of woodland management.

Anyone is invited to participate in the shropshirehardwoods.com ash tree project. Some people may wish to produce high quality goods, others, simple everyday items.

Participants are free to promote their own business, club or group on a stall at the Fair providing they display the items made. Materials will be charged for at cost.

Conditions of participation.

- 1) You make an effort to pass on your project remnants to others.
- 2) Retain unused materials (including saw dust) and bring it all to the Fair.
- 3) You display your item/s and promote your business, club or group at the Fair.
- 4) Where practical you assist in erecting and/or dismantling the display.
- 5) You are free to charge for your items as you wish.
- 6) You complete and return the shropshirehardwoods.com Ash Tree Project carbon log book by 20th of August 2010.
- 7) You refer to the project in any correspondence, promotion or advertising as 'shropshirehardwoods.com Ash Tree Project.
